Team Work:

Maram AlEnezai

Mesheel AlOtibi

What is the Eyenak?

Is a project and task management environment that facilitates communication among members of the team to share ideas

How does your Eyenak work?

A set of tasks performed by those working on the project, is characterized by a flexible system to help manage projects professionally and uniquely

Tasks Dividing

Tasks are divided into section, added by the project manager and customized by task type.

Message

to become Eyenak serve all segments of society, It provides the requirements for rapid management and delivery managed with the team

Vision

Create an appropriate proces environment for the client that has all the needs for project management

Target

Help the project administrator in the management and performance Tasks And ease of communication between all members the team

Project Description:

- ✅ Website that enables entrepreneurs to track their business, record their observations and work with the team easily and professionally.

- ✅ Projects were divided into three categories:
  Either the project is: public, private, or shareable with people who can work with you.

- ✅ Contains sections and within each task section related to it.

- ✅ The task system has many characteristics, including: the date and condition of the task and the people involved.

Now we will talk to you about how it works

Projects have been classified into three categories:

- General: All members of the organization/company can be informed and follow up all updates and status of progress of the project.

- Private: Projects that take place between specific members of the team and are not shared with anyone else who has not been invited to this project.

- Sharable: The project owner invites people from outside the team to the project, so that there are more opinions or to inform the project owner how the project works.

- Each category contains the projects in which it is included and the corresponding work sections for each project.

The philosophy of Eyenak logo:

The Eyenak logo is designed from the task list and we can customize the tasks under your vision

The eye code is set to inform you of all tasks that have been added and are being worked on and completed tasks related to the project.

We hope the Eyenak to be provided to you:

√ Comfortable working environment.

√ Ease in project management.

√ All requirements that facilitate the work of the Group.

√ Advanced features in one place.

√ Exchange information easily and quickly.

√ Know all updates for the project at the same time.
